

ABSTRACT

5        A stable skin care product containing a first composition comprising about  
0.001% to about 10% of a retinoid; a second composition comprising about  
0.0001% to about 50% of at least one retinoid booster and about 0.001% to about  
10% of a phytoestrogen; a first compartment for storing the first composition; and  
10       a second compartment for storing the second composition, the first and second  
compartments being joined together.
